DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 2, 3, and 7-9, drawn to a lever/linking arrangement, classified

in class 074, subclass 519.

II. Claims 4-6, drawn to a coefficient of friction testing device in

combination with a lever/linking system, classified in class 073,

subclass 9.

Claim 1 is a linking claim. Claim 1 will be examined with the election of either

Group I or Group II.

2. Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the

combination as claimed does not require the particulars of the subcombination as

claimed for patentability, and (2) that the subcombination has utility by itself or in

other combinations (MPEP § 806.05(c)). In the instant case, the combination as

claimed does not require the particulars of the subcombination as claimed

because the coefficient of friction testing apparatus of claim 4 does not require the

lever/linking systems as found in claims 2, 3, and 7-9. The subcombination has

separate utility such as a lever/linking system for raising and lowering a platform

attached to any rigid structure, e.g., the mower deck of a tractor.

Art Unit: 2856

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Rogers whose telephone number is (571) 272-2205. The examiner can normally be reached on Monday - Friday (0730 - 1600).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
